Weather	The change in atmosphere in one place on one day.	Sticky Assessment Knowledge																																																																																												
Continent	A large, solid area of land. Earth has seven.																																																																																													
Latitude	To find out how far north or south a location is, lines of latitude are used. These lines run parallel to the equator.	<input type="checkbox"/> I know where major locations are in the UK.	Useful Websites																																																																																											
Longitude	To find out how east or west a place is, lines of longitude are used. These lines run from the top of the earth to the bottom.	<input type="checkbox"/> I know where countries are in Southern and Northern America.	https://kids.kiddle.co/Scafell_Pike https://informativefacts.com/pico-de-orizaba-facts/ https://www.meteoblue.com/																																																																																											
Population	The number of living people that dwell in the same place.	<input type="checkbox"/> I know about the environmental regions and key physical characteristics of South America and Great Britain including forests, rivers, mountain ranges (biomes) and climate.																																																																																												
Equatorial	A climate that is tropical due to its location near the equator (an imaginary line around the middle of the world).	<input type="checkbox"/> I know about major similarities and differences between Mexico and the UK.																																																																																												
Mesoamerica	A geographical region beginning from the Tropic of Cancer, in Mexico and ending near Costa Rica. An area where a number of societies had been formed before the Spanish arrived In the 15 th century.	<input type="checkbox"/> I know and understand the Water Cycle.	Misconceptions and Facts																																																																																											
		<input type="checkbox"/> I know and understand the lifecycle of a river.	<ul style="list-style-type: none"> The tropics and equator are NOT visible lines around the world. They are imaginary lines shown on maps or globes.
